

Lesson 03 Demo 02

Creating a Video Using AI

Objective: To utilize InVideo to create a video for dynamic and engaging content tailored to specific preferences and settings

Tools required: InVideo

Prerequisites: None

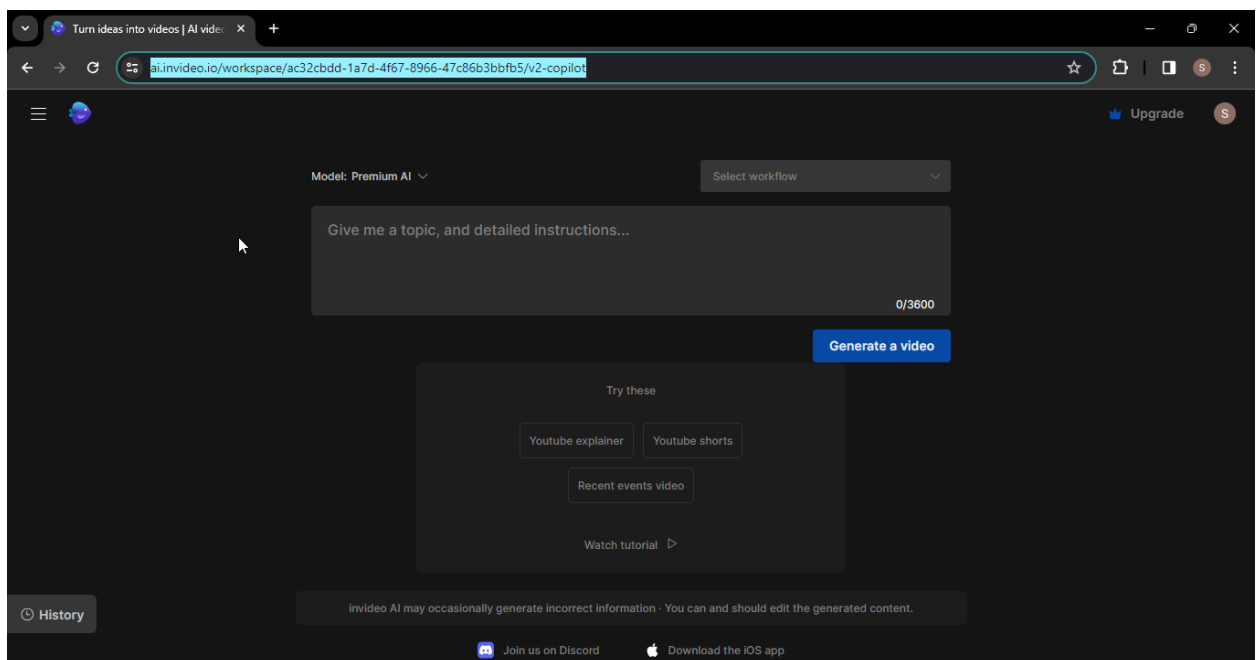

Steps to be followed:

1. Generate a video for a scenario using InVideo

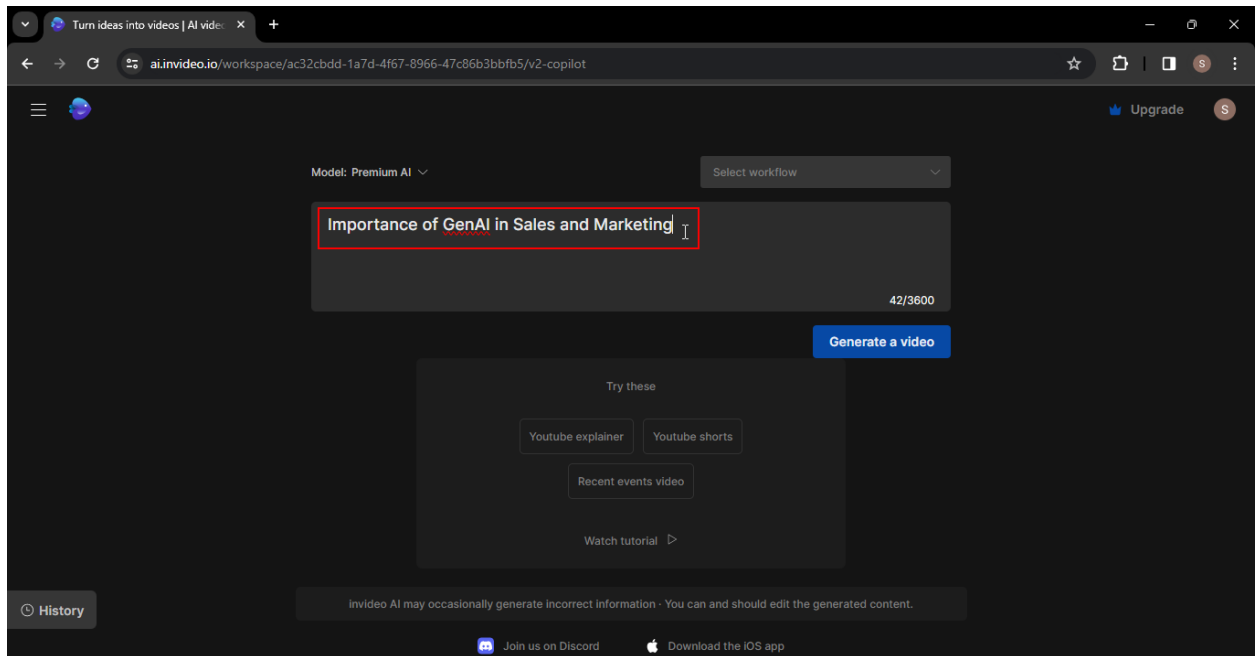

Disclaimer: Please note that the GenAI tool used in this exercise can produce varied outputs even when presented with similar prompts. Thus, you may get different outputs for the same prompt.

Step 1: Generate a video for a scenario using InVideo

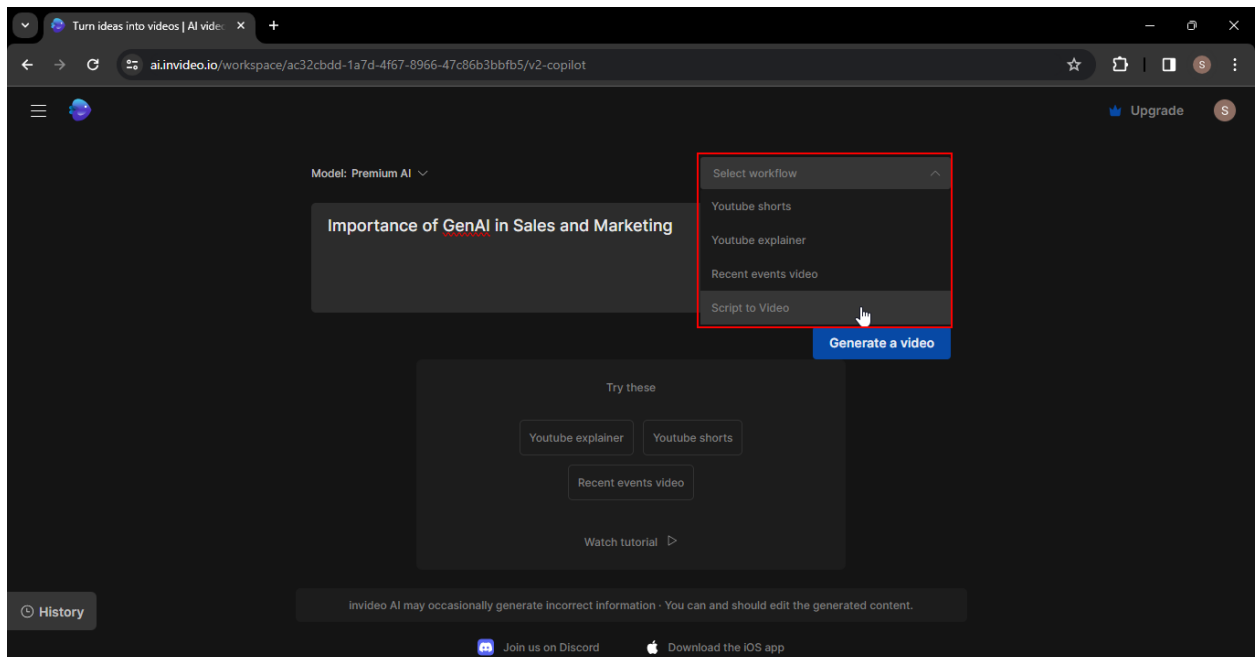

- 1.1 Navigate to the <https://ai.invideo.io> website

1.2 Add the desired prompt

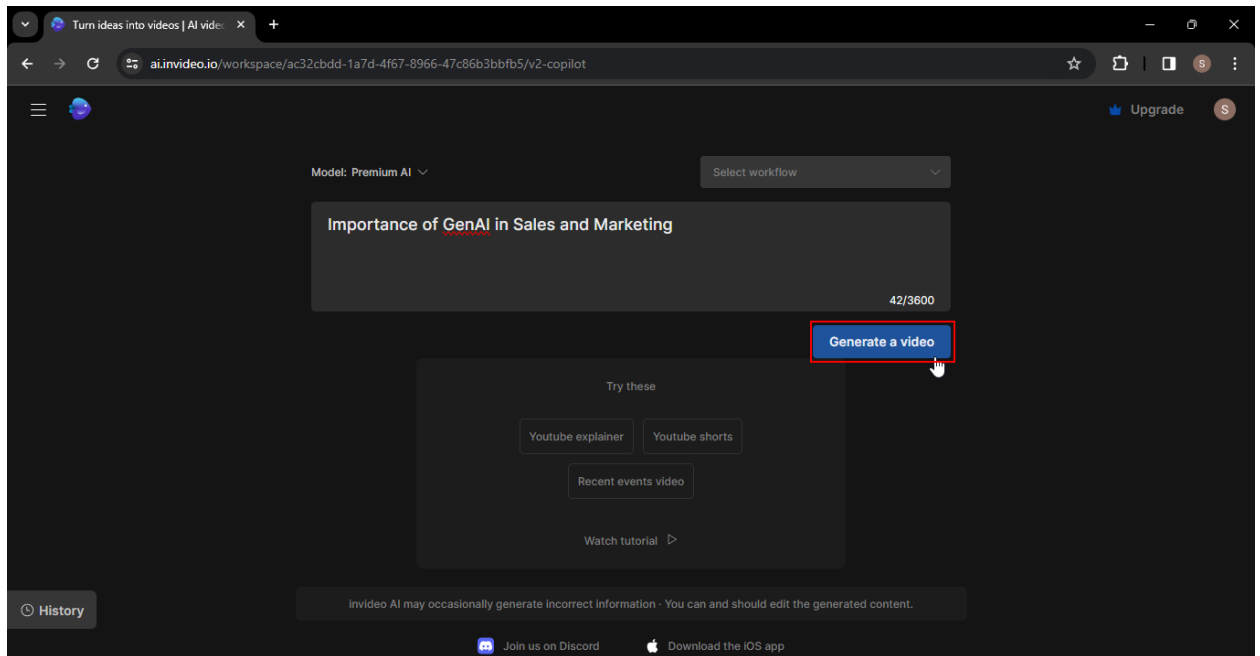

1.3 Select the workflow as desired

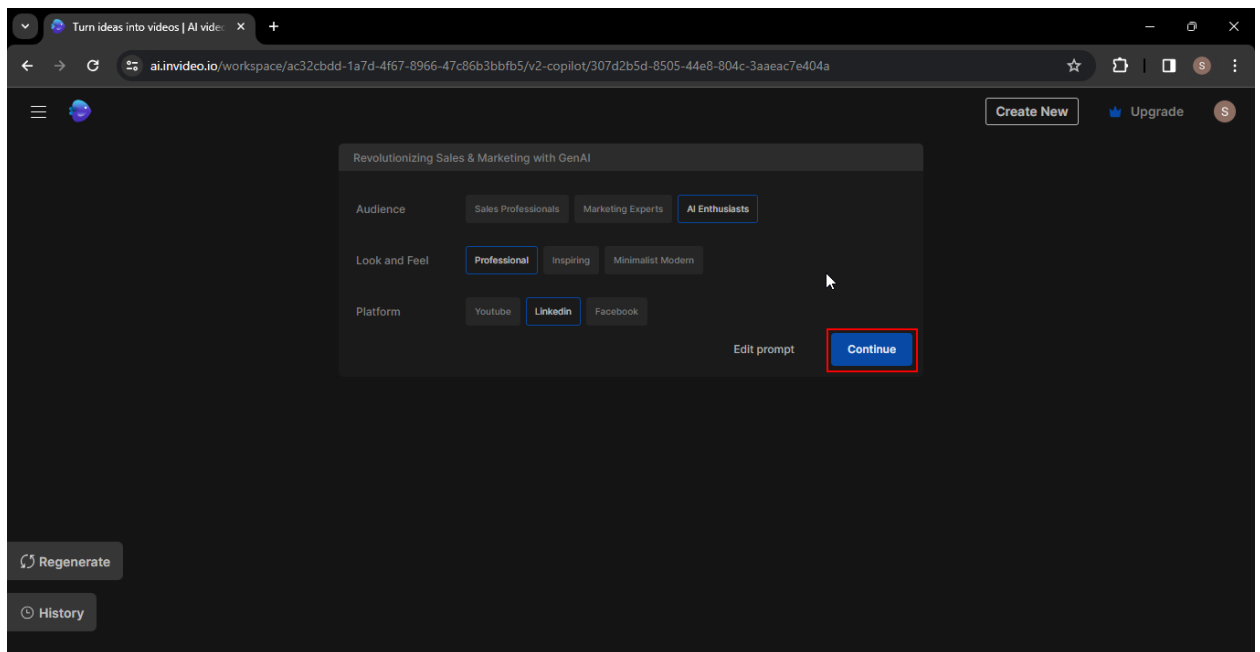

Note: Keep the default option if you don't want to select any workflow

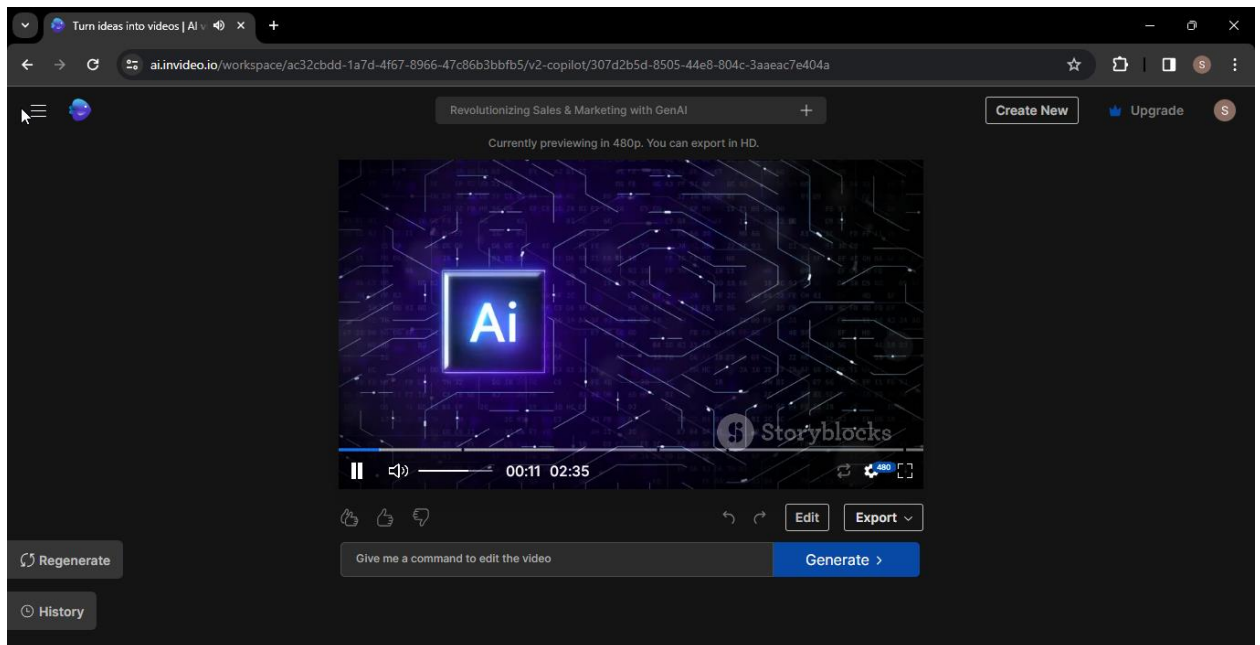

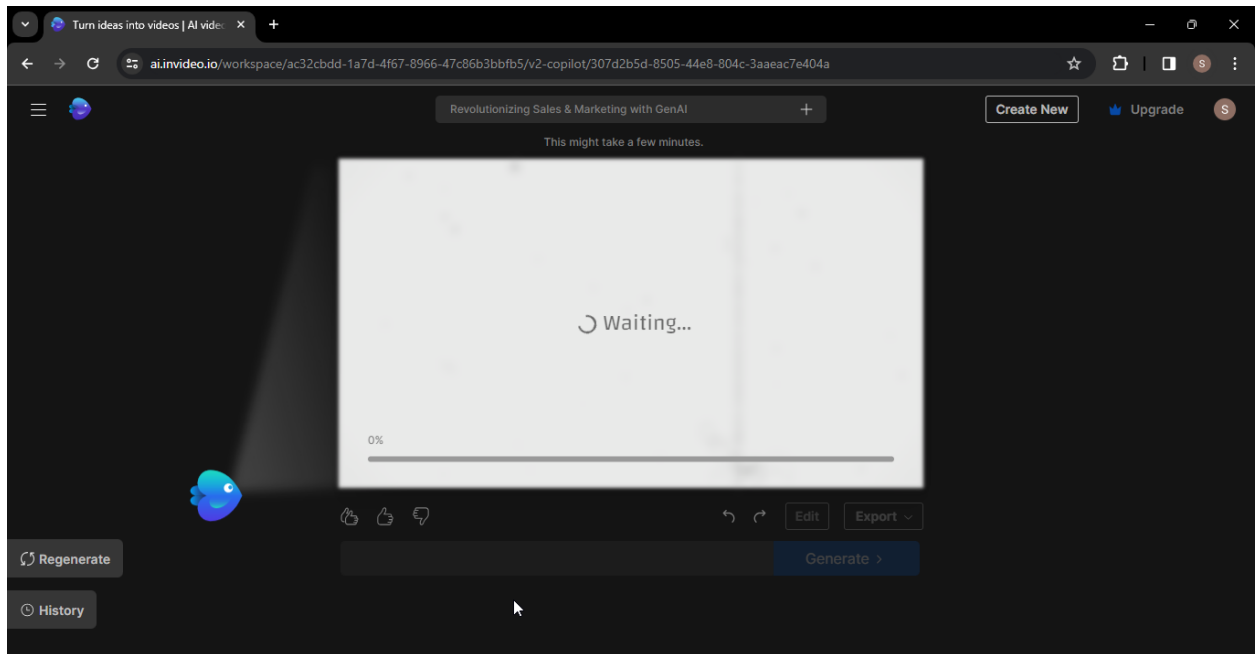

1.4 Click on the **Generate a video** button

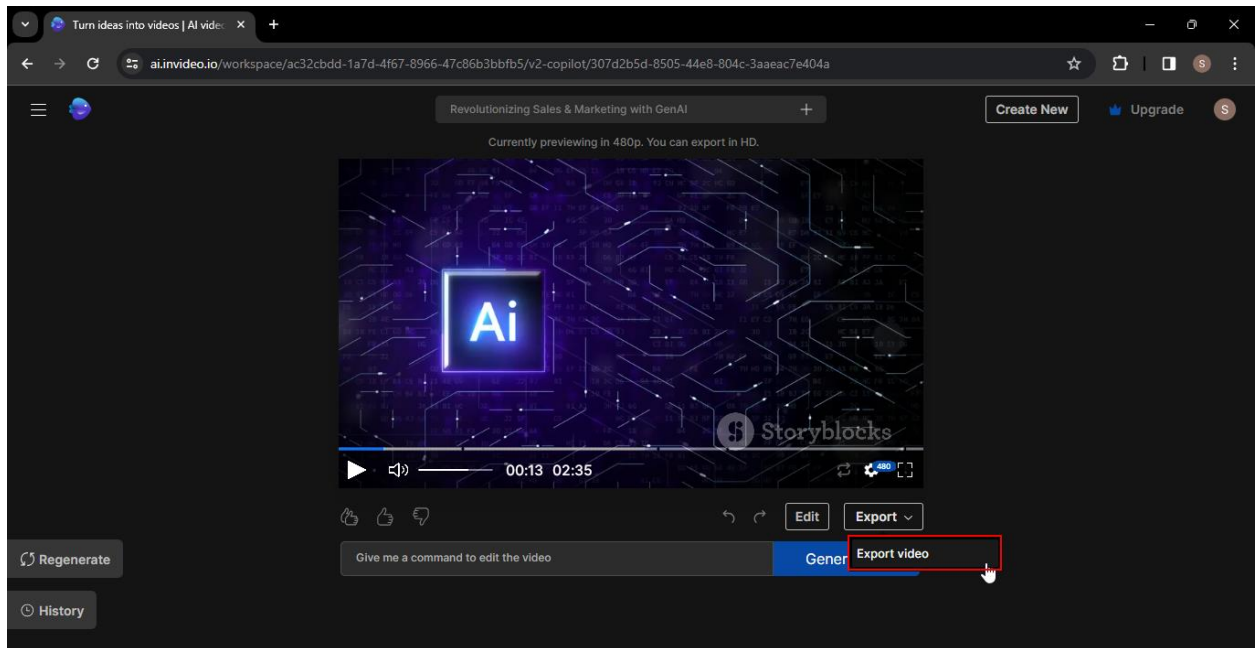

1.5 Select the desired options for **Audience**, **Look and Feel**, and **Platform** as shown in the screenshot and click on the **Continue** button:

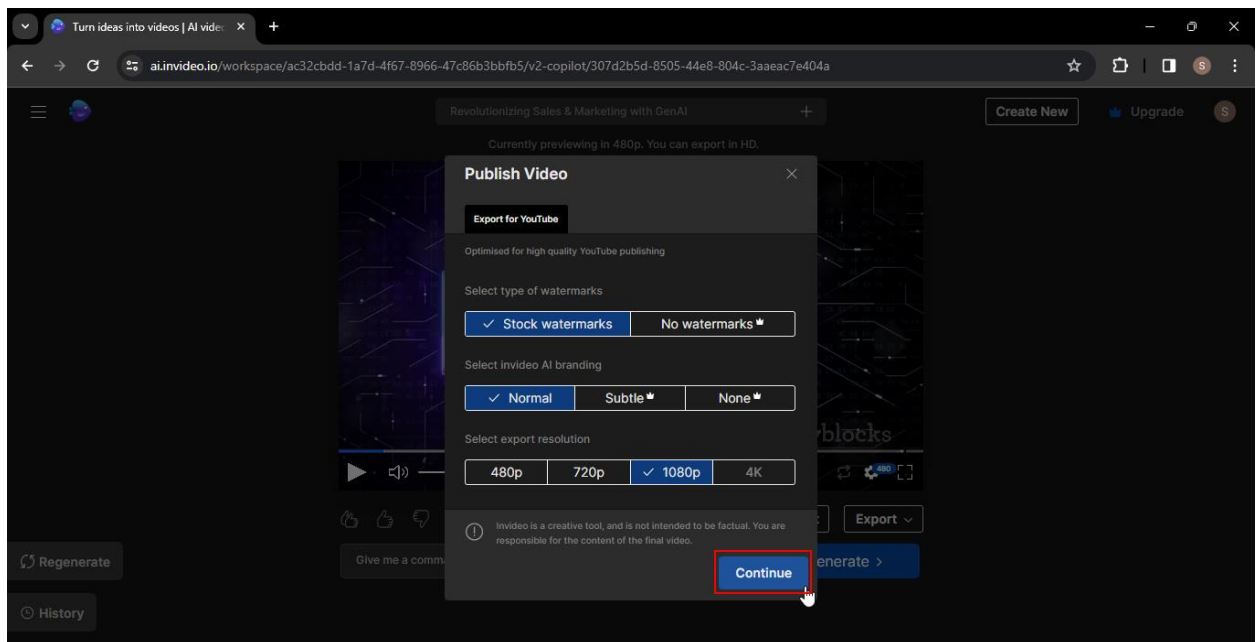

It takes up to 2 minutes to generate the video.

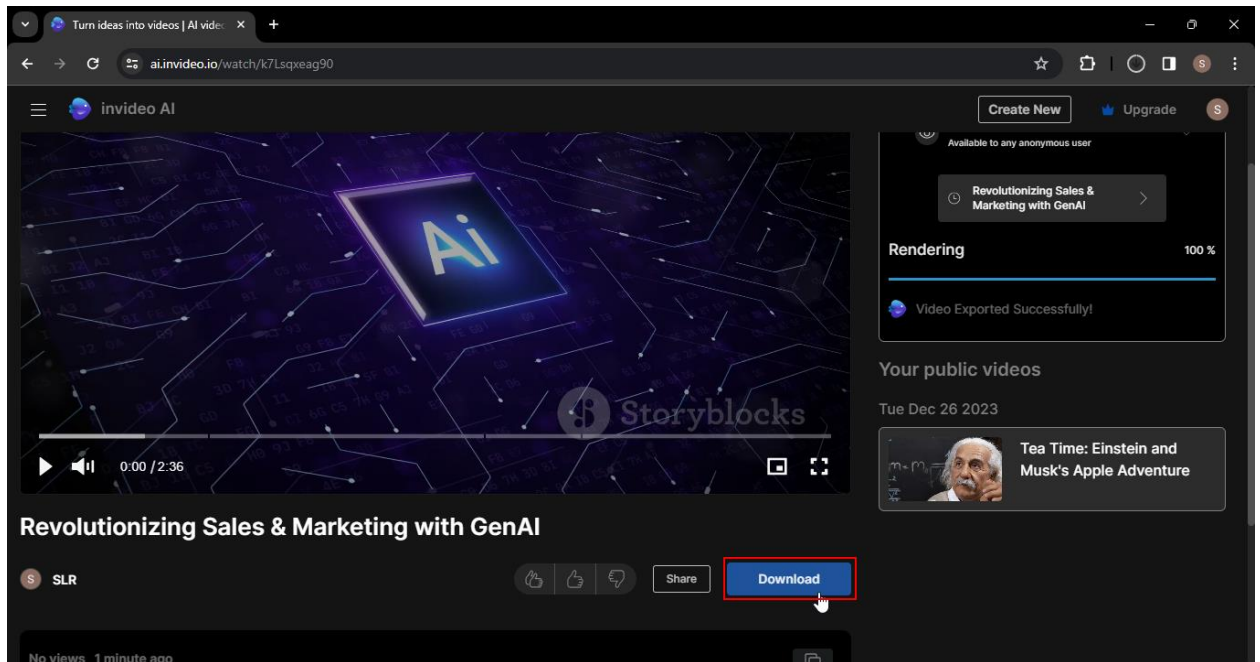

1.6 Click on the **Export** dropdown, and then select the **Export video** option

1.7 Select the options as shown in the screenshot below and then click on the **Continue** button:

1.8 Click on the **Download** button to save the video

By following these steps, you have successfully created a video and demonstrated the effective use of InVideo for crafting dynamic and engaging videos, customized to specific preferences and settings.
